Ref. No. AERB/RSD/PMS-NODRS/2019/ 37

January 08, 2019

Subject: Personnel Monitoring Services to the personnel working in Industrial practices involving radiation sources

In industrial practices involving radiation sources, it has been a practice that personnel monitoring service (PMS) is provided to workers as recommended by AERB. As per the present procedure, allotment of PMS number is done by National Dose Registry System (NODRS) based on approval of Radiation Professional through eLORA or concurrence from AERB on PMS request applications received from NODRS.

Now, AERB has decided that the PMS should be made available to radiation workers from industrial facilities without recommendation from AERB. However, such requests should be made by the employer of the industrial radiation facilities in consultation with the RSO, so that TLD badges are issued only to appropriate persons and misuse of the badges can be prevented. It may be noted that we will be sending a separate circular to all the industrial radiation facilities regarding the subject matter.

Therefore, NODRS may issue the PMS numbers without referring the matter to AERB or seeking the eLORA approval.
